

A long-exposure photograph of a city street at night. The image is characterized by vibrant orange and yellow light trails from moving vehicles, which curve through the frame. Several palm trees are silhouetted against the dark sky, with one prominent tree in the upper left. In the background, a multi-story building with lit windows is visible. The overall atmosphere is dynamic and urban.

FLEXA LIGHTING NORTH AMERICA

Founded in Florence, Italy, Flexalighting designs and manufactures high-end architectural lighting solutions for indoor and outdoor environments. Focused on developing miniaturized, high-quality, reliable lighting tools, combined with a strong customer-centric approach, Flexalighting quickly became a premium player in the global market spanning more than 60 countries. In 2017, Flexalighting North America opened a facility in Vancouver, Canada, where catalog products and bespoke solutions are engineered and produced in compliance with regional technical and installation standards.
