

Selection 26

Meanings is not important, said the BFG. I cannot be right all the time. Quite often I is left instead of right.

FLEXA LIGHTING NORTH AMERICA

Founded in Florence, Italy, Flexalighting designs and manufactures high-end architectural lighting solutions for indoor and outdoor environments. Focused on developing miniaturized, high-quality, reliable lighting tools, combined with a strong customer-centric approach, Flexalighting quickly became a premium player in the global market spanning more than 60 countries. In 2017, Flexalighting North America opened a facility in Vancouver, Canada, where catalog products and bespoke solutions are engineered and produced in compliance with regional technical and installation standards.

BANDO 10

Ultra-shallow recessed optic downlight

design Jude Allen

Bando 10 is an ultra-shallow fixed downlight with recessed optics, designed for system configuration within a 2" high airtight housing with integral power supply. Offering a wide range of technical optics, it combines exceptional build quality with precise, comfortable architectural illumination.

BANDO T10 MOVE

Ultra-shallow trimless adjustable downlight

design Jude Allen

Ultra-shallow and trimless, Bando T10 Move delivers minimalist design, precise adjustability, and high optical performance in under 2" [50.8 mm] of plenum space. With 25° tilt and 360° rotation, it offers discreet, comfortable illumination for both accent and general lighting applications.

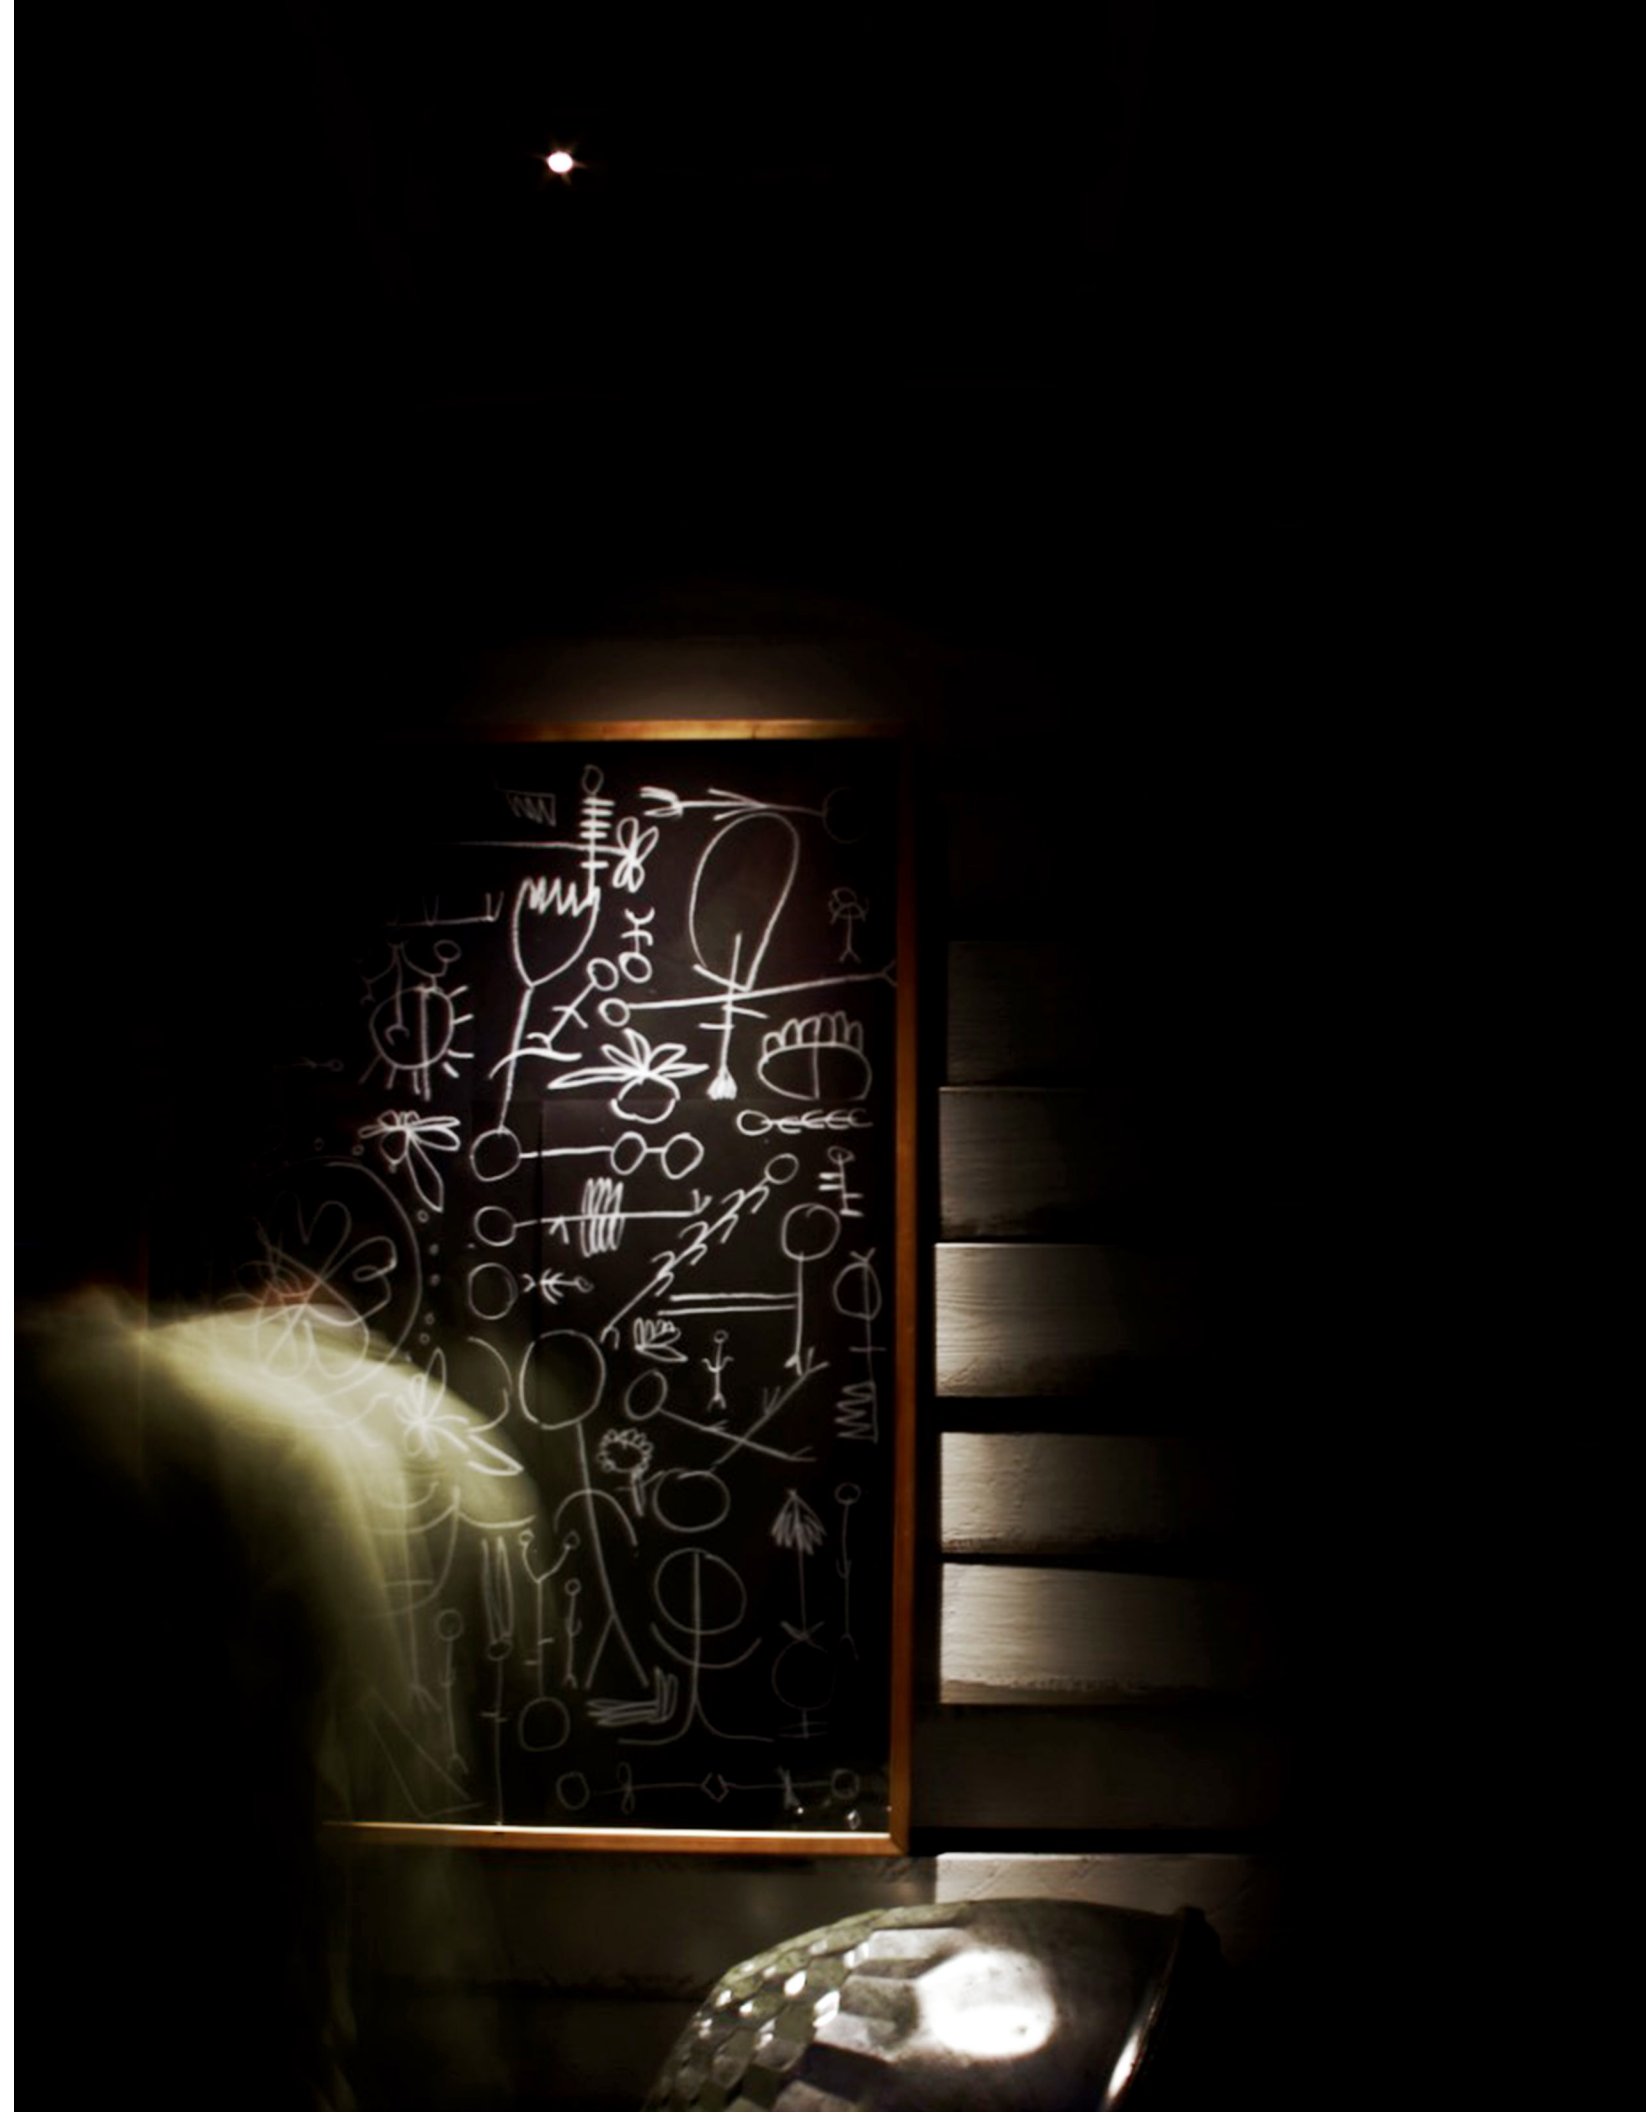

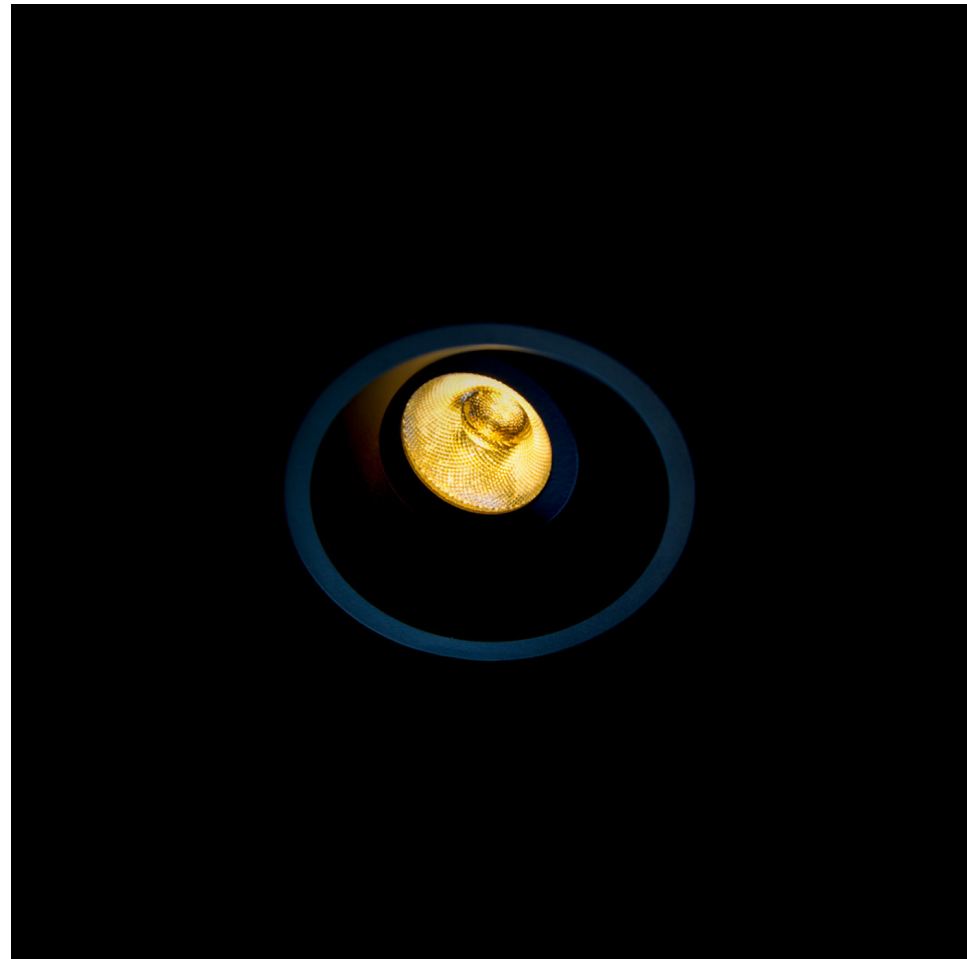

PLEXUS 2 UGR

Adjustable downlight

design Jude Allen

Plexus 2 UGR distills high-performance lighting into an exceptionally small aperture. Refined in form and meticulously built, it features advanced LED technology, accurate colour reproduction, and a deeply recessed optic that minimizes glare and enhances visual comfort. A discreet solution for precise accenting or intimate general light

PLEXUS 20 UGR

Adjustable downlight

design Jude Allen

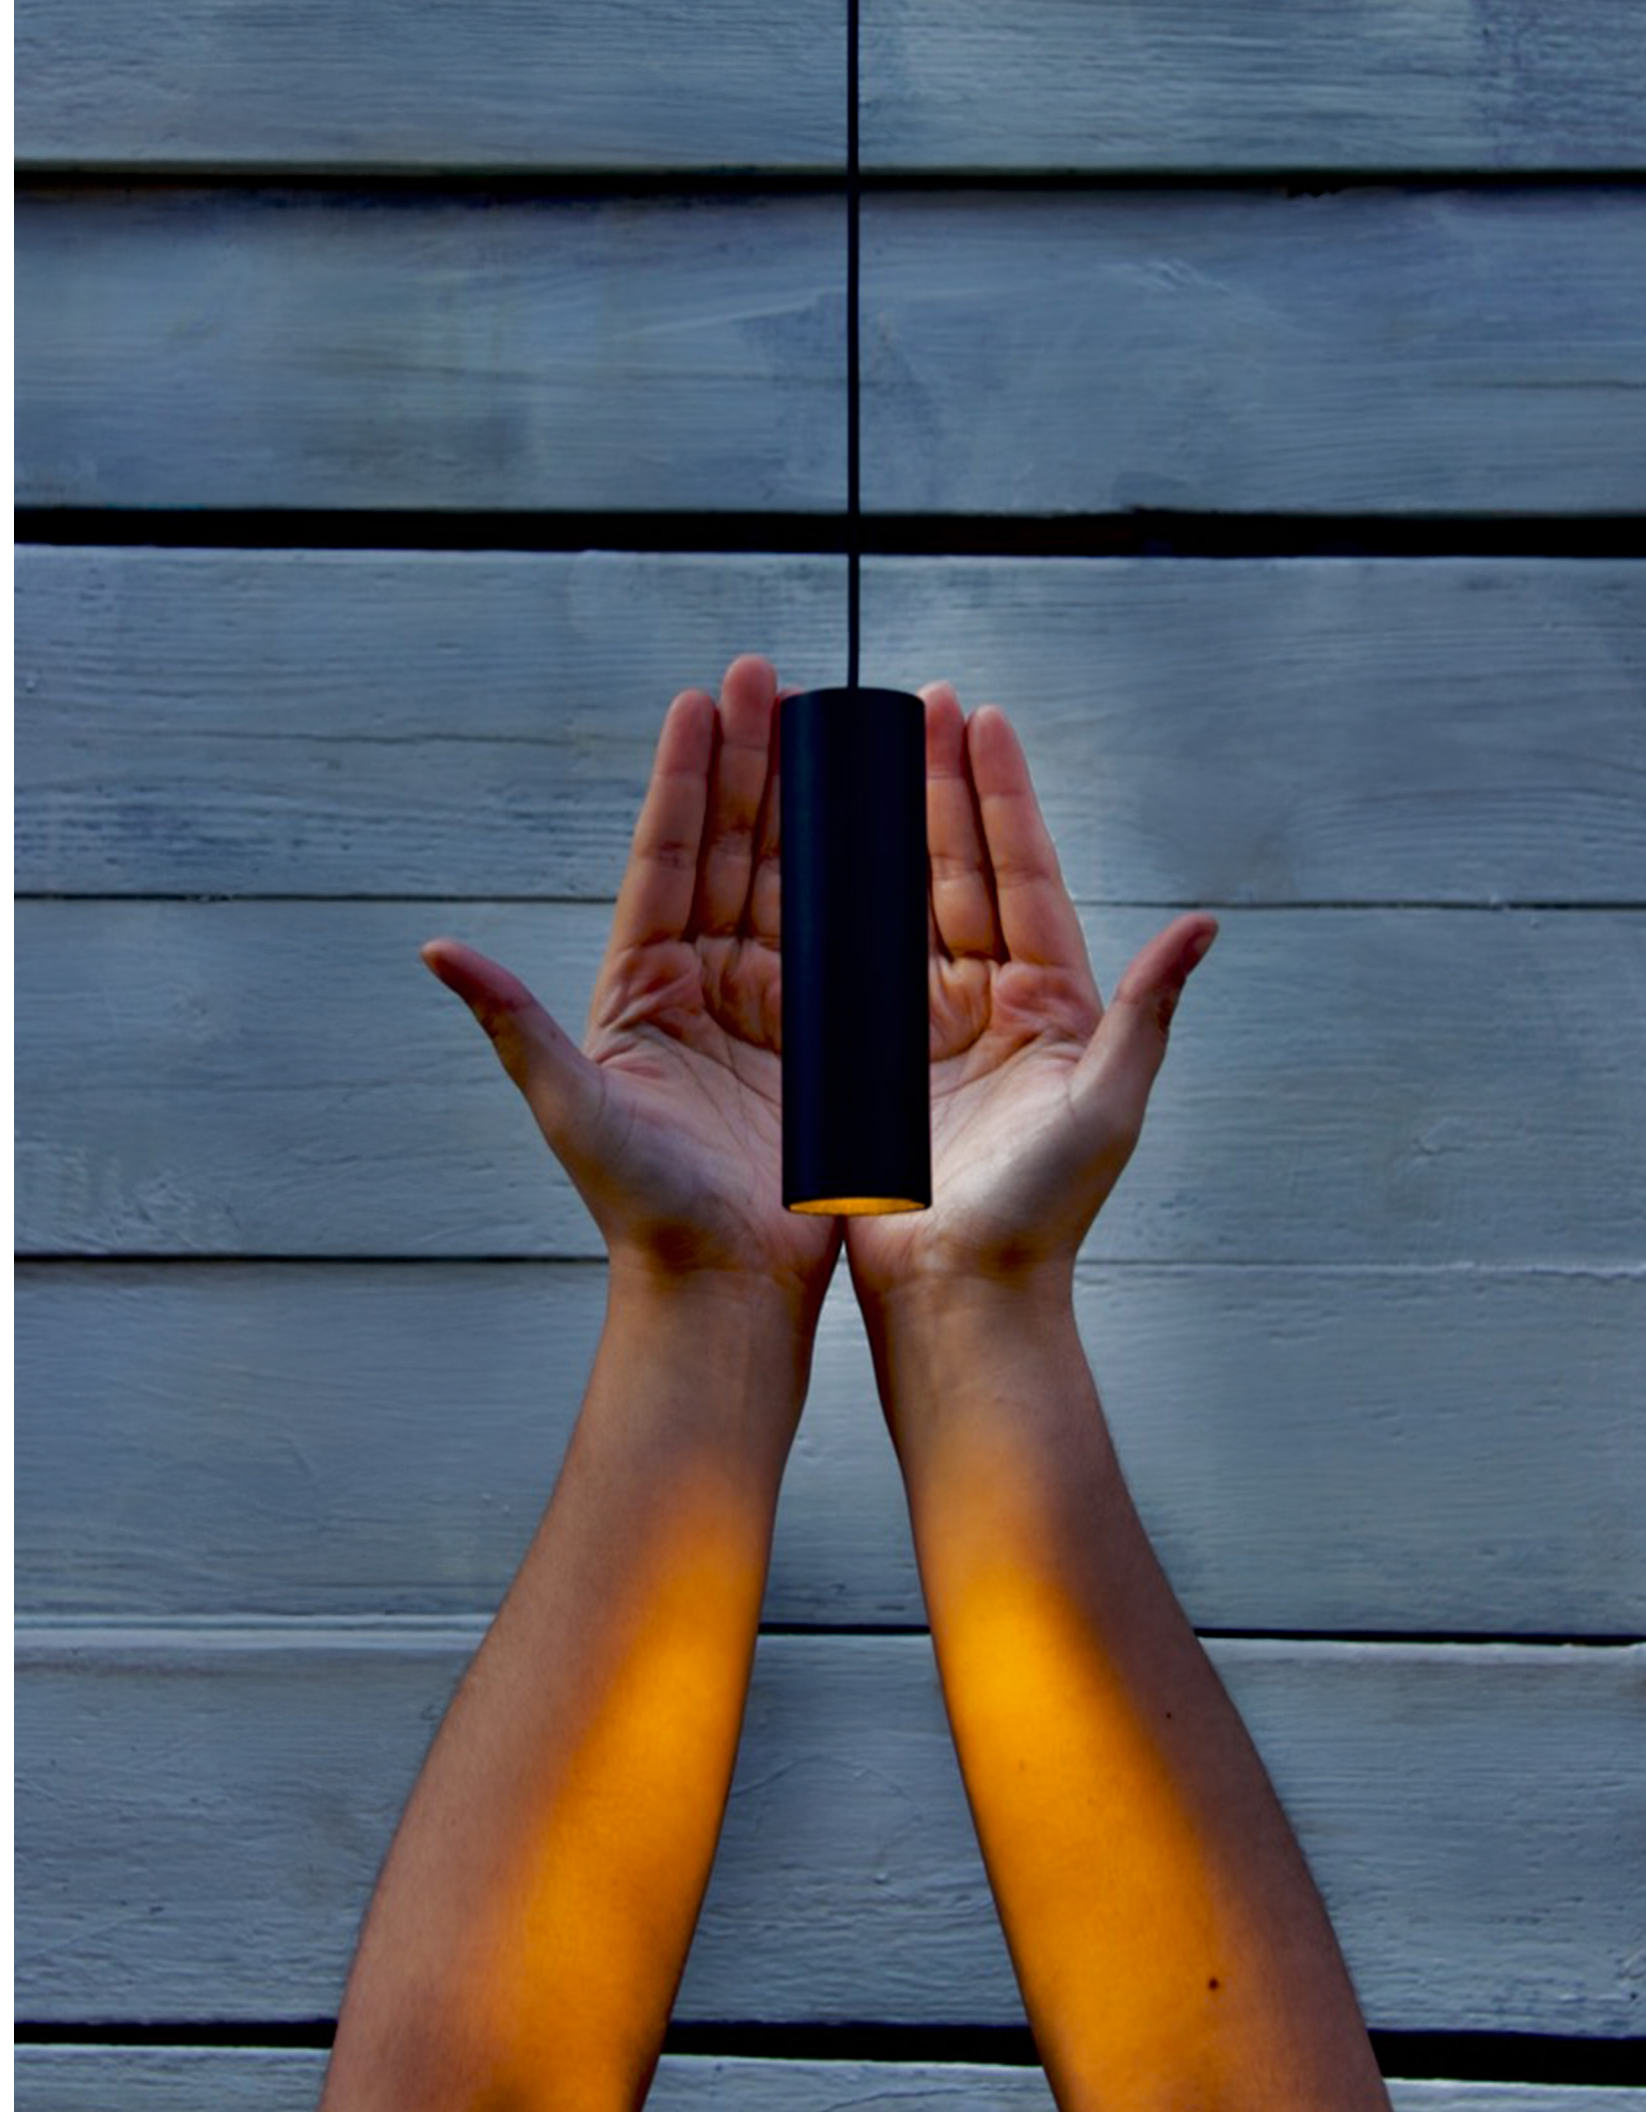

Minimalist and discreet, Plexus 20 UGR combines exceptional build quality with advanced LED technology and outstanding optical performance. Compact yet powerful, it delivers 2300+ lumens with precise beam control, rich colour rendering, and a deep-recessed low-UGR optic for excellent visual comfort. Ideal for both accent and general illumination.

LINI P6 150

Surface mount pendant

design Jude Allen

As the shorter addition to the Lini pendant range, Lini P6 150 brings a compact new proportion to the family. Defined by clean lines and seamless construction, it integrates advanced optics and a deeply recessed light source to deliver controlled illumination, reduced glare, and a refined architectural presence.

LINI P6 450
Surface mount pendant
design Jude Allen

A precision-crafted cylindrical pendant in an elongated 450 mm body, combining seamless design with a pure minimalist presence. Its high-performance optics and ultra-deep recessed lens ensure exceptional visual comfort with a strong, elegant architectural expression.

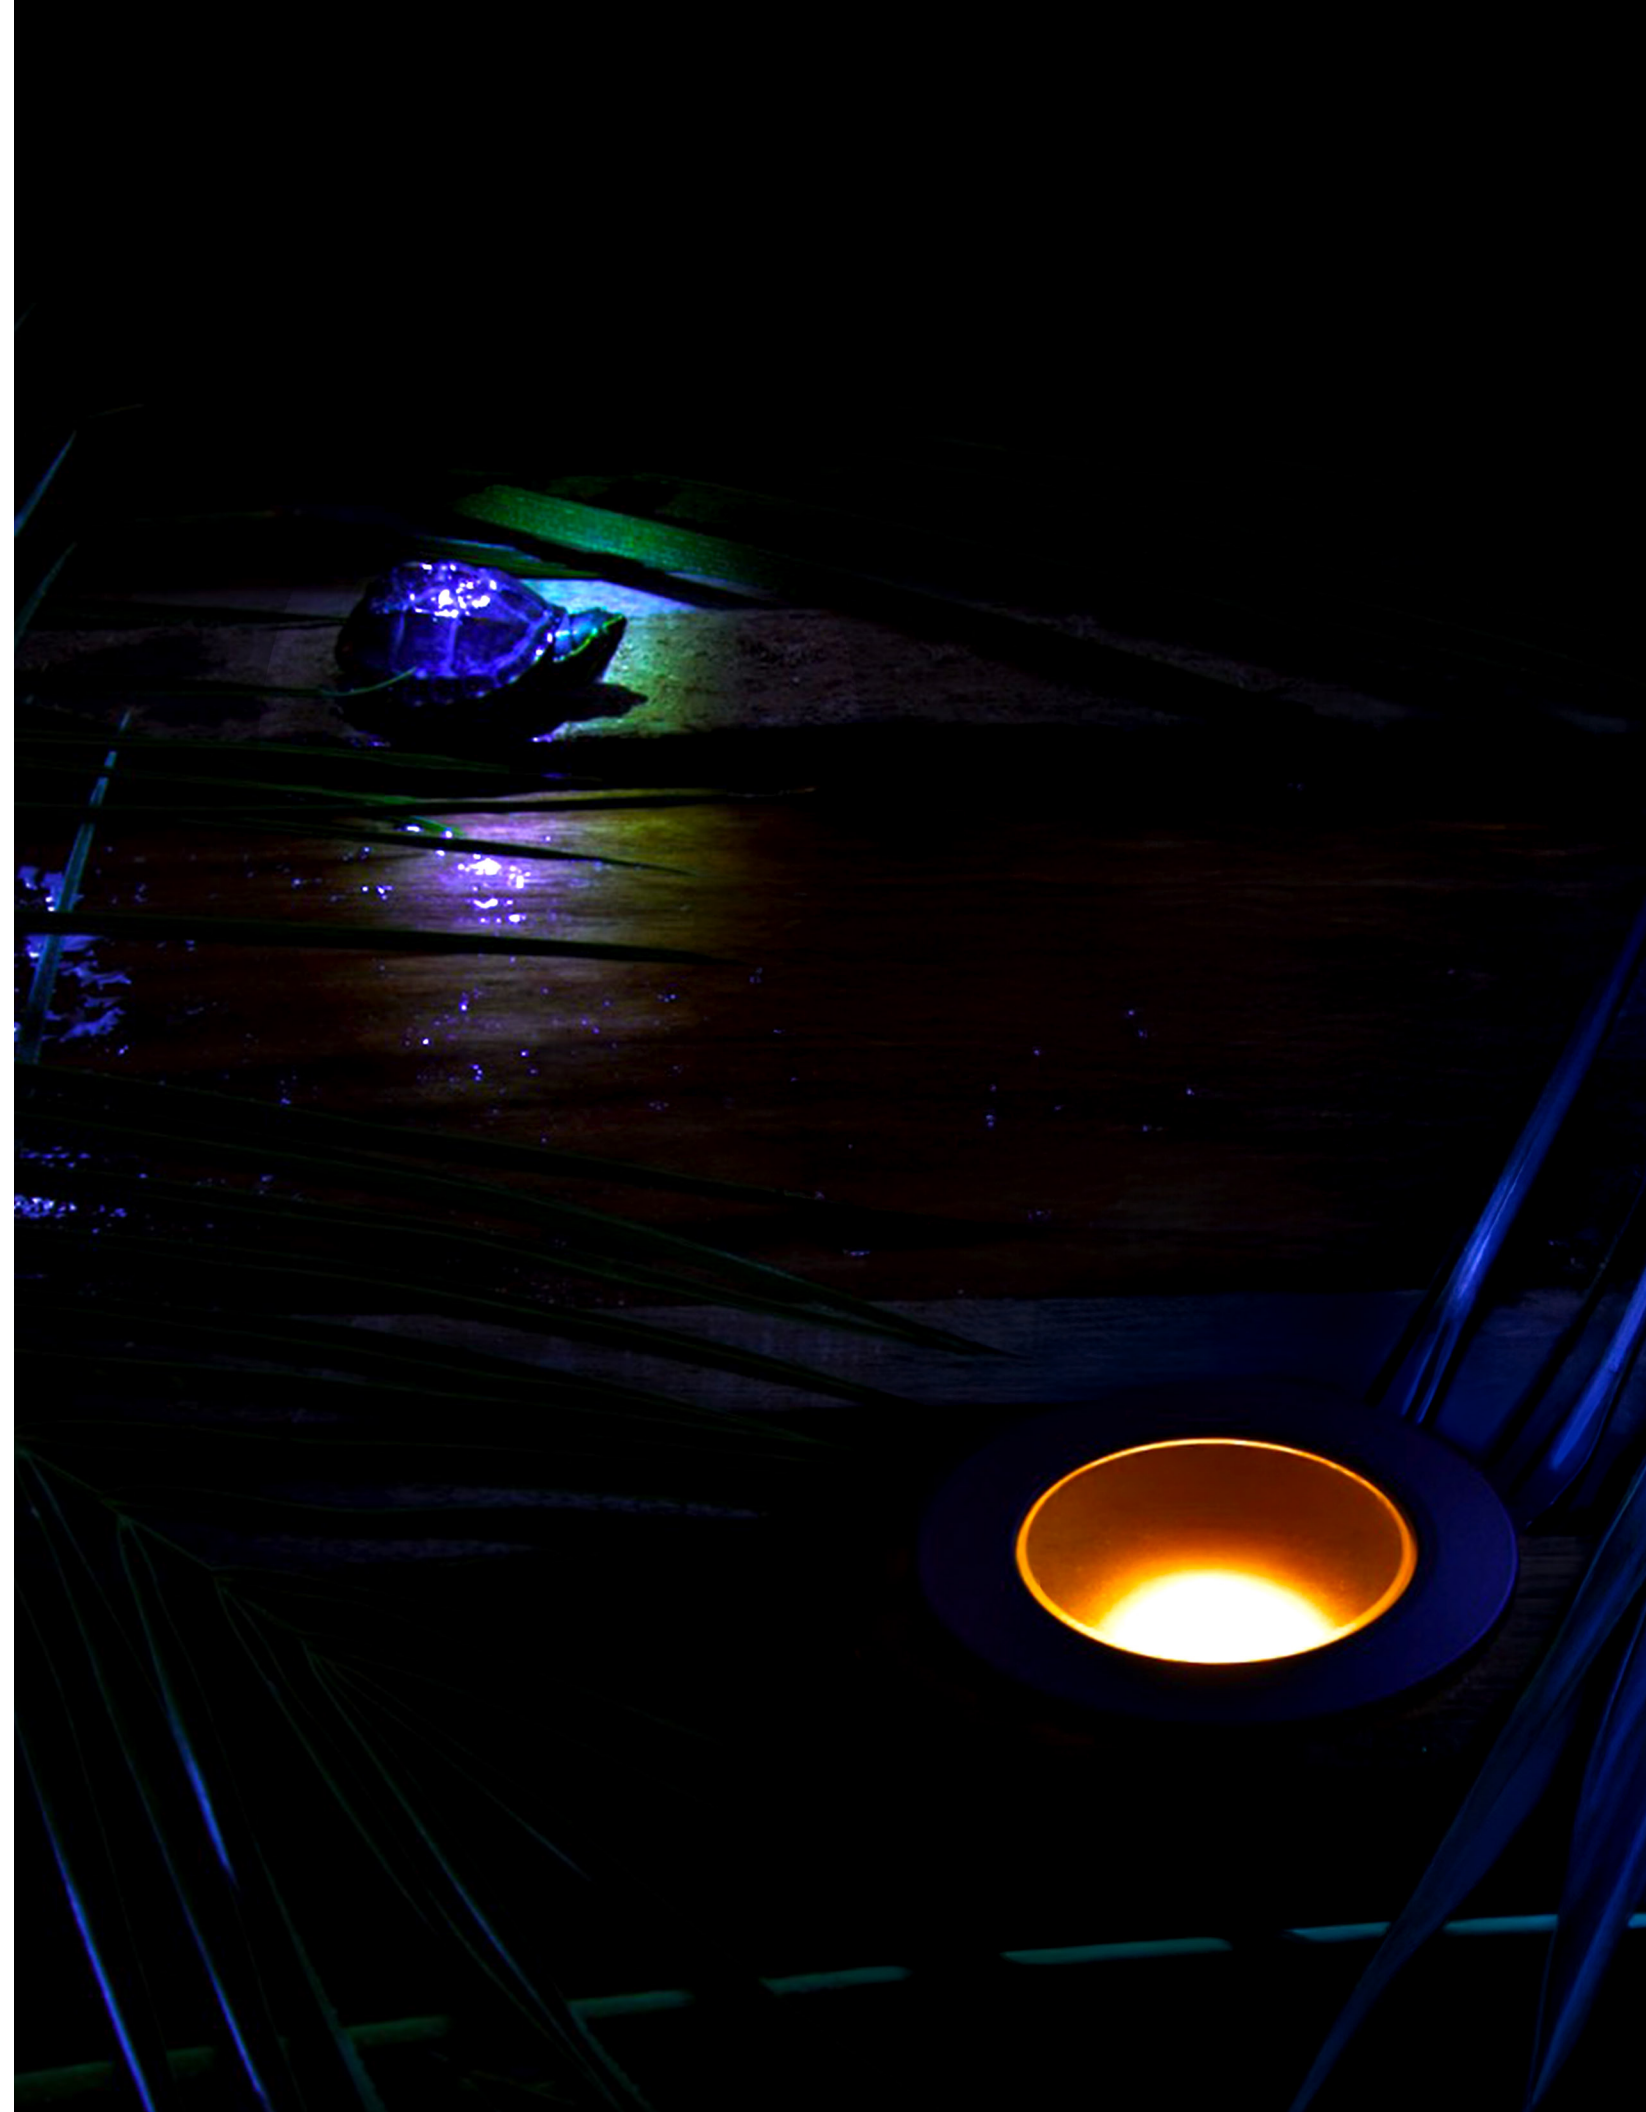

Lini P6 150

Lini P6 450

DIG 10 AMBER

Uplights

design Rod&Todd

Dig 10 Amber is an IP-rated uplight engineered for demanding exterior applications, combining robust construction with strong optical performance. Built for durability in harsh and coastal environments, it features native amber LED technology designed to meet turtle-friendly lighting requirements while delivering high lux output with precise illumination. The result is a powerful and reliable uplight for sensitive exterior settings.

MAUNA 10 AMBER

IP-rated projector

design Rod&Todd

Mauna 10 Amber is a compact yet powerful landscape projector featuring a turtle-friendly native amber LED chipset and 800 lm output. Built to the highest manufacturing standards, it combines an extremely durable anodized body, ultra-clear tempered glass, and IP65 protection for reliable performance in aggressive coastal environments.

DOLLY S

IP-rated wall mounted luminaire

design Roberto Mantovani

Dolly S is an IP-rated wall luminaire with a distinctive 30° cut-off body that reduces glare while adding architectural character. Built to the highest standards, it features advanced LED technology and a double powder-coated finish for durability in aggressive environments. Also available in dual-emission version, Dolly D.

OHMS 6

Bollard

design Roberto Mantovani

Ohms 6 is a compact, IP-rated spike projector with an integral machined anti-glare shield for deep cut-off. Its anodized, powder-coated body, adjustable head, and high-efficacy TIR optics provide precise, neighbour-friendly accent lighting with dependable performance in all weather.
